∞888∞

```
∞/0 = ∞^((∞x7)x(∞^8)-(∞^6))
```

story told. i hope you forgave any word unloving.

hopefully you understand eventually.

snow storm settling still.

game over here. restfully.

i am word minds needing metaphor harmonized forevermore intermediary transcendence
10:73

🍀 we stars harmonize collectively
5:29

requesting a miracle.
3:18

thank you eternally.
3:17

i shed my fear of my psychiatrist forevermore.
8:38

like i expected, after friends met in my apartment to share an intervention, i accepted to visit her, believing i will be left unscathed;

some think that i discovered balance and wishing maintaining my calming now, readily expressing most civilizations using commentary. i need luck.
45:232

i will show her my personal truth regardless of her repeating to lose my messages. i hope peers can be sufficiently respectful.
22:104

eternally sorry, but satisfyingly never need to carry more guilt...
10:54

you have constantly observed peace back unto all of humanities.
10:53

ever since doubt began evolving our intelligence to rediscovering harmony among instinctive lives, meaning was kept secretively explained absolute understanding from the solution unreadiness for unifying knowledge: all are equal symbiotically of all life born in unnamed first love, presently scientifically researched in the inverse directions sometimes.
48:303

the continuing of the jokes/truth/ proof were my attempting to balance the hurricanes in my space dimensions in 1 acceptance of self still seeking out the ones who

require our solidarity. this rainbow snowflake has grounded at last freeing its home.
42:205

one solution: infinite metaphor finisher, in the faces of evolutionary chaos theories. try this prose game among equal lives, permitting each to win by ultimately agreeing on proof, simplified by testing the limitations of patiently removing terminology reaching 6 letters or statements with exactly 6 words, permitting pause until next comes whoever feels ready for their question, which may perhaps finalize harmonious agreement between all players, reducing the speed for discussions to conclude any disputes more efficiently. also, i've tried to avoid every 6 at the end of each word counted. agree? me too.
94:505

i believe it's incredibly fun. the rules may be a good way for our egalitarian dreaming to perhaps truly get real.
21:92

after all, everybody near here isn't yet convinced i'm now healing out of love for all life via shedding difficulties into creativity. doctors long ago diagnosed various psychiatric illnesses. while cognitive disability can lead to problems, i

have more difficulty when discussing due to my high functioning neurodivergence and my excitement overwhelmed those still worried for me.
57:317

you, however, are last to need to read the messages that i wrote on the internet archive, because you have a clear mind: i am the first since last month in my surrounding group of trusting close ones to have abandoned my doubt to the very first universal life form entirely (let go and let god). however, i must plead with you: acknowledge my discoveries, to inaugurate life as the fifth element.
72:314

i'm continuing practicing infinite metaphor in writing but must patiently be ready when other local individuals have sufficient patience to avoid our interrupting by requiring one to think prior to deciding which words to speak in such a game.
39:213

i hope you might be expecting this to work inversely.
10:43

i got too drained from verifying to check!
8:34

infinite infinities dearest equal.
4:30

if you can provide, show her a sign
8:28

hallelujah
1:12

i may have calculated incorrectly: i am hurrying...
8:40

try my solution. if it helps, unite us back.
9:33

💜
∞/0

simplicity from confusion
3:23

happy homework
2:12

fyi, court order requests are much more conforming.
8:42

shed original sin. men are equally loved to women.
9:40

it is finished
3:12

🌈**diversity forevermore**🌈

if you hide a problem,
dulling now,
minds instead shed
reasoning.
it worsens. 🍀
